This 4G63 Timing Belt job should be performed every 60,000 miles on your turbocharged interference 4G63, and sooner than that if you are racing your vehicle or abusing it. So grab your jackstands and you torque wrench, as we go over our How To Change a 4G63 Timing Belt Guide. Parts you will need to complete this job:

How To Change a 4G63 Timing Belt - My Pro Stret

This write up will show you how to set base ignition timing using an adjustable timing light. This applies to all 1G 4G63 engines INCLUDING non turboed 4G63's, as well as the 97-99 4G63 DSM's. The 95-96 4G63 DSM's DO NOT use a cam angle sensor (CAS) which will not allow you to adjust the base timing.

The Mitsubishi Sirius or 4G6/4D6 engine is the name of one of Mitsubishi Motors' four series of inline-four automobile engines, along with Astron, Orion, and Saturn.. The 4G6 gasoline engines were the favoured performance variant for Mitsubishi. The 4G61T powered their Colt Turbo, while the 4G63T, first introduced in the 1980 Lancer EX 2000 Turbo, went on to see service in the Sapporo and ...

Mitsubishi Sirius engine - Wikipedia

difficulty setting ignition timing on my 4g64 Hey guys first post here. Just bought a 92 mighty max with a blown head gasket for my work truck. Anyways rebuilt her from the head up, she runs pretty Damn well. Anyways ive never had to deal with a dizzy before and just a tad confused here. I have a dial back timing light to get the timing.

difficulty setting ignition timing on my 4g64

the timing marks on the 4G63/4G64 are indicated on the gears, there are pointers casted into the timing cover and head, on the slinger washer behind the crank gear that has a half moon cutout. Now when you set the crank timing mark, when you look at the mark on the gear it will be pointing at the casted pointer (or pin) which is about 10 or 11 o clock when looking straight at the front of the engine.

4g64 piston and rings change and timing, power issue ...

But when using the 4G63 cam gears, each cam gear timing mark MUST be advanced a half a tooth. You can simply make a new timing mark with white out or a paint pen on each gear to provide a more accurate and visible timing mark. You will also need to use the DOHC 4G64 timing belt, again from the 1994 DOHC 4G64 Galant.
