Treatable causes of death accounted for 403 per 100,000 deaths in people with learning disabilities, compared to just 83 per 100,000 deaths in the general population, according to the University of Bristol's 2019 LeDeR Annual Report.. The report, published today [16 July], indicates that the majority of people with learning disabilities continue to die before reaching the age of 65.
