IIT Kanpur - StuDocu

Exercise 2: Let F be the

field of complex numbers. Are the following two systems of linear equations equivalent? If so, express each equation in each system as a linear combination of the equations in the other system.

$$\begin{aligned}x_1 - x_2 &= 0 \\ 3x_1 + x_2 &= 0\end{aligned}$$
$$\begin{aligned}2x_1 + x_2 &= 0 \\ x_1 + x_2 &= 0\end{aligned}$$

Solution: Yes the two systems are equivalent.

Hoffman Solution

In my first Linear Algebra class I could desultorily flip through the textbook 30 minutes before tests and make 100s. Not so with Hoffman and Kunze. Hoffman and Kunze make no concessions for lazy undergrads, and their prose, although concise, leaves no room to skimmed over. Yes, it can be--and

and d to t . That is, set $t = c + d$. Then, from (1), $ax + b(c + d) = e$. Thus, solutions of (1) and (2) are of the form $x = \frac{e - b(c + d)}{a}$. Find two particular solutions by assigning different values to c and d . Set $c = 1, d = 0$. This gives $x = \frac{e - b}{a}$. Set $c = 0, d = 1$. This gives $x = \frac{e - b}{a}$.
