Abstract. Disability studies seeks to reframe rehabilitation's understanding and responses to disability. Disability scholars point out that rehabilitation's perspectives and practices are not objective, but instead reflect particular historical and ideological forces. By demonstrating how rehabilitation practitioners can unintentionally do things that are unhelpful or even harmful, disability scholars challenge the profession of occupational therapy to reconsider aspects of practice ...

Rethinking Disability and What To Do About It: Disability ...

Disability as a health outcome deserves more attention than it has so far received. With people living longer and the epidemiological transition from infectious to noncommunicable diseases as the major cause of health burden, we need to focus attention on disability – the non-fatal impact of heath conditions – over and above our concern for causes of mortality.
