Low key images can look like they must have been taken in a professional studio, but you can do it almost anywhere. The trick is to set your camera to use very a fast shutter speed, low ISO settings, and a narrow aperture. This will keep out the ambient light so the only light visible in the final image be from your flash.

Lighting is the most important part of photography. First make sure that your studio will not allow any outside light sources to creep in. For most photography, a small crack under a door won't be a problem, but even that can ruin certain types of shots. Three umbrella lights are sufficient for any size studio.

How to Equip a Professional Photography Studio: 14 Steps

I've lived here my whole life and have photographed New York City extensively for the last 14 years. I've taught photography tours and workshops to travelers from all over the world, and that has helped me better understand how people perceive New York.. Here are some of my favorite tips to help people understand the city and to get the most out of their photography in New York.
